

Blackie Daniels

May 19, 2016

Blackie was our fur child. She passed over on May 19, 2016. I asked Gog to be with you while you were sick and you passed on her birthday! I know she is with you. Blackie was a rescue that was with us for 7 and half years, probably about 10 years old. She was a sheppard mix. Blackie was diagnosed with cancer TCC of the uretha.

My husband, sister in-law or myself were always with her. She had spinal surgery right after we found out she had cancer. We went to Purdue and followed their plan. She could no longer go upstairs so either my husband or myself would sleep downstairs on the couch, so she would never be alone. She had five rescue brothers and sisters. Blackie was and is the love of our life. She was the best dog ever. We took her in October of 2008 and time flies. Blackie Ann you are the best. You are missed. We want to tell you, like Payton you will always be missed and always in our thoughts. We know that Gog, mom and dad are with you. One day your sisters and brothers and daddy and mommy will be with you. Know mommy and daddy keep you in our hearts all the time. 'Mommy loves her Blackie, she is a good one.'

Payton Pie will be at your side. You have no idea how much we love you and miss you. We have your pictures and video to watch to keep you even closer to us. Your sisters and brothers miss you very much. You will NEVER leave our thoughts. We all are wearing a locket with your ashes in it. That way we can keep you next to us and our hearts. One day we will again be together. Love you forever. You will never be forgotten. You are 'a Good One'. From

your Mommy, Daddy, Angel, Buddy, Jack, Tinker, and Billy.
