

Tillijane Smith

June 29, 2007 - September 4, 2019

Tillijane was a rescued from the shelter in the month of May, 2008. She was very quickly adopted and brought into the loving home of Gene and Wanda Smith and stayed in their warm care for 12 years.

Tillijane was a beautiful girl and had many favorite activities she loved to do with her family. She loved to go for walks and getting her belly rubbed by her furparents. Tillijane had many favorite treats, some of them being lean treats, chew sticks, lettuce, and green beans.

She has a few favorite toys, a few of them being her stuffed teddy bear and small balls. She loved having her belly rubbed by Gene and they could often be found passed out together in the recliner. And though she loved spending time with her family, she didn't like getting bathed or groomed.

Wanda fondly writes "She would sleep near my feat in the recliner, waking me up in the morning at 7am with kisses. and giving me kisses for an extra treats. After Gene died she followed me wherever I went and if I was staying in one place she would lie down between me and the doorway as if she were protecting me.

Tillijane passed away September 4, 2019 and is survived by Wanda Smith, her daughter Lanetta Stewart, and the several other family members.
